

DONG ENERGY CLIMATE AWARD

STUDENT COMPETITION

Due to our modern lifestyles global energy consumption grows and there is no longer any reason to doubt that this affects the climate. The challenge is to provide reliable energy without affecting the climate.

DECISION MAKERS OF THE FUTURE

DONG Energy and the organizers of the conference Joint Actions on Climate Change wish to involve decision makers of the future to provide innovative solutions on reliable energy that combat climate change. University students in engineering, natural sciences as well as social sciences are asked to submit proposals describing their solutions.

EVALUATION OF PROPOSALS

The proposed solutions should be realistic within the first half of this century. Furthermore the solutions are evaluated against the following four criteria

- Impact on climate change
- Degree of innovation
- Inspiration to others
- Feasibility

The first prize is 30.000 DKK, the second prize is 20.000 DKK and 3 third prizes receive each 10.000 DKK. The awards are sponsored by DONG Energy.

**The submission deadline is
Monday May 25 at 12 pm (GMT).**

PROCEDURE

To participate, please send a summary (max 1,000 words) or send a poster (format A1) to contact@jaocc.net. Make the subject of the e-mail "DONG Energy Climate Award" and attach your proposal as a pdf-file.

Based on an initial screenings by the scientific committee for the conference, 35 student projects are invited to exhibit during the conference and to explain the project in more detail to the jury.

THE JURY TO SELECT THE WINNERS CONSISTS OF:

- Charles Nielsen, Director R&D, DONG Energy
- Eskild Holm Nielsen, Head of Department Aalborg University
- And three international experts.
